

Business Case

LendWise Finance UK - Loan Servicing Transformation

1. Executive Summary

LendWise Finance UK is experiencing operational delays and reporting control issues across its loan servicing lifecycle. The project improves the end-to-end flow from application intake to investor reporting by automating verification, removing duplicate data entry, introducing exception queues, strengthening reconciliation and implementing daily Power BI reporting.

2. Current Business Problems

- Manual verification causes 2-3 day delays before underwriting can begin.
- Duplicate data entry between application, underwriting and loan setup tools increases rework.
- Payment reconciliation is completed manually in spreadsheets, creating discrepancies.
- Investor reporting is delayed because operational data is refreshed monthly or through ad hoc extracts.
- UAT defects escape because requirements, test cases and defects are not fully traceable.

3. KPI Baseline and Target

KPI	Current State	Target State	Business Benefit
Average approval turnaround time	5.4 days	2.0 days	Faster customer conversion and lower operational backlog
Manual verification rate	82%	25%	Lower effort and fewer document handling delays
Reconciliation accuracy	93.0%	99.5%	Fewer payment exceptions and investor reporting breaks
Investor reporting delay	2 business days	Same day	Improved reporting confidence
Escaped UAT defects	34 per release	8 per release	Better release quality

4. Recommended Solution

- Integrate digital KYC and affordability validation.
- Introduce automated repayment schedule generation.
- Create a daily payment reconciliation routine using matching rules.
- Implement exception case management with priority and SLA.
- Build Power BI dashboards for loan operations, payments, reconciliation and investor reporting.

5. Estimated Benefits

Benefit	Expected Outcome
Operational cost reduction	25% effort reduction across verification, reconciliation and reporting tasks
Control improvement	Daily reconciliation and exception ownership reduce

Loan Servicing Process Improvement | Business Analyst Portfolio

	unresolved breaks
Customer experience	Approval cycle reduced from 5.4 days to 2 days
Management visibility	Daily KPI dashboard for leadership and finance teams
