

Functional Requirements Document

LendWise Finance UK - Loan Servicing Transformation

1. Functional Modules

Module	Functional Requirement	Input	Output
KYC Service	Validate identity, address and document status	Customer details, uploaded documents	Verified / Failed / Manual Review
Underwriting Engine	Calculate affordability and route to approval workflow	Income, commitments, credit score	Pass / Refer / Fail
Loan Setup	Create loan account and repayment schedule	Approved application	Loan account, schedule, payment mandate
Payment Reconciliation	Match received payments to expected instalments	Payment file, loan schedule	Matched, short paid, missed, overpaid
Exception Queue	Create, assign and track operational exceptions	Mismatch records, KYC failures	Case ID, owner, SLA status
Investor Reporting	Prepare daily investor portfolio dataset	Loan and payment data	Portfolio report and Power BI dataset

2. Validation Logic

Rule ID	Rule	Failure Action
VAL-001	Mandatory customer ID, DOB, email and postcode required	Block application submission
VAL-002	Duplicate customer detected by email + DOB or phone + postcode	Route to Duplicate Review
VAL-003	Income must support monthly instalment under affordability threshold	Route to Manual Underwriting
VAL-004	Payment amount must match expected instalment within £5 tolerance	Create Payment Mismatch Exception
VAL-005	Investor balance must reconcile to loan ledger balance	Create Reporting Break Exception

3. Non-Functional Requirements

- Daily batch reconciliation must complete before 07:00 UK time.
- Dashboard refresh should complete within 30 minutes after data extract is available.
- Role-based access must restrict customer PII to approved operations users.
- Audit trail must capture user, timestamp, old value, new value and change reason.
