

User Stories and Acceptance Criteria

LendWise Finance UK - Loan Servicing Transformation

1. User Story Backlog

Epic	Story ID	User Story	Linked Requirement	Priority
EPIC-01 KYC Automation	US-001	As a Loan Officer, I want customer identity verified automatically so that application checks are completed faster.	BR-001	High
EPIC-01 KYC Automation	US-002	As a Compliance Officer, I want failed KYC cases routed to manual review so that regulatory exceptions are handled safely.	BR-002, BR-022	High
EPIC-02 Underwriting	US-003	As a Credit Analyst, I want affordability calculated using verified income and commitments so that decisions are consistent.	BR-004	High
EPIC-02 Underwriting	US-004	As an Underwriter, I want high-risk applications sent to manual review so that risk controls are maintained.	BR-005	High
EPIC-03 Loan Setup	US-005	As an Operations Analyst, I want approved loans created automatically so that duplicate data entry is removed.	BR-006, BR-007	High
EPIC-04 Payments	US-006	As a Finance Analyst, I want daily payment files imported so that collections data is available on time.	BR-008	High
EPIC-04 Payments	US-007	As a Finance Analyst, I want mismatched payments flagged daily so that reconciliation discrepancies reduce.	BR-009, BR-010	High

Fictional portfolio project for recruiter review - no real customer data

EPIC-05 Exception Handling	US-008	As an Operations Manager, I want exceptions assigned by category and SLA so that ownership is clear.	BR-011, BR-012	Medium
EPIC-06 Investor Reporting	US-009	As an Investor Reporting Manager, I want a daily portfolio dataset so that investor reports are not delayed.	BR-013	High
EPIC-06 Investor Reporting	US-010	As a Leadership user, I want Power BI KPIs refreshed daily so that decision-making is based on current data.	BR-014, BR-015	Medium

2. Acceptance Criteria

Story ID	Acceptance Criteria
US-001	Given valid customer details and documents, when KYC API verification runs, then status changes to Verified within 30 seconds.
US-002	Given an invalid passport or failed address match, when verification completes, then the case appears in Compliance Review with reason code.
US-003	Given verified income and loan amount, when affordability is calculated, then the system returns Pass, Refer or Fail using approved thresholds.
US-005	Given an approved loan, when loan setup is triggered, then repayment schedule and account record are created without rekeying customer data.
US-007	Given a payment amount different from expected instalment, when reconciliation runs, then an exception is created with category Payment Mismatch.
US-009	Given daily payment and loan balance data, when investor extract runs, then portfolio balance equals loan ledger balance within tolerance.
