

UAT Test Summary Report

LendWise Finance UK - Loan Servicing Process Improvement

Summary

The UAT cycle validates core business requirements across KYC automation, loan setup, payment reconciliation, exception handling and investor reporting. This fictional evidence pack is designed to demonstrate Business Analyst testing governance, traceability and defect management.

Metric	Value
Total Test Cases	30
Passed	24
Failed	4
Blocked	2
Critical Defects	1
High Defects	3
UAT Recommendation	Conditional sign-off after critical retest

Key Open Risks

- Investor report missing one payment adjustment scenario.
- KYC API timeout handling requires retest.
- Duplicate application edge case requires additional regression coverage.
